Since 1992

We are next to breeders
and agricultural producers
who want to transform
and sell directly

Do you have a building?

Agrifood plants

We design, manufacture and install lines for the slaughtering of red, white meat and game; for dairy, fruit and vegetable, fish and cereal processing.

You don't have a building?

Plug-and-play modular plants

Complies with European health and hygiene regulations

Solid and durable structures

Ecological and with low environmental impact

MADE IN ITALY

"We have been breeders for generations and, 10 years ago, we chose the modular plant to transform and sell our products directly at the farm. The module made us know and grow in an unexpected way, enough to allow us to invest in a larger solution. This new plant is automatic and in masonry capable of satisfying the requests of all our customers. SINT accompanied us on this journey with enthusiasm and professionalism."
