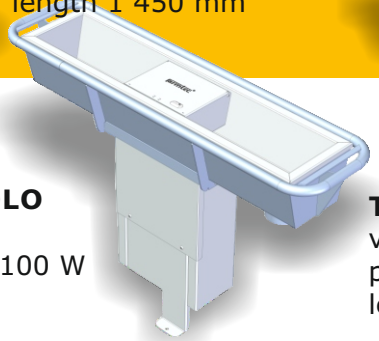
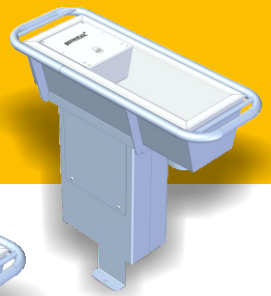
volume 52 l
power consump. 100 W
length 990 mm



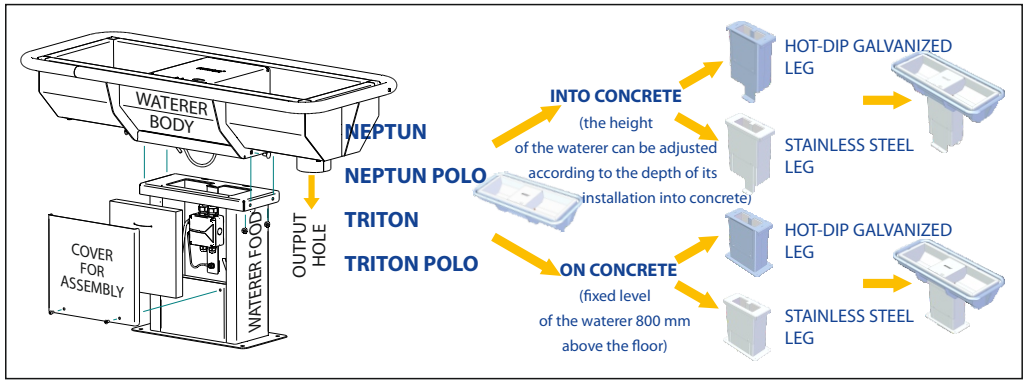
TRITON III
volume 38 l
power consump. 120 W
length 1 450 mm

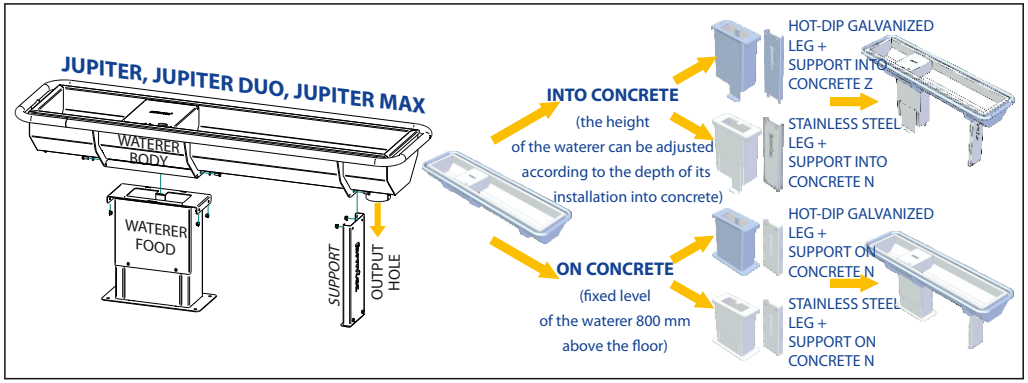


TRITON III POLO
volume 25 l
power consump. 80 W
length 1 030 mm

MERKUR III
volume 13 l
power consump. 60 W
length 400 mm

FARMTEC III. generation waterers consist of two separate parts - from **waterer foot** (made of stainless steel or hot-dip galvanized, in two mounting options - on or into concrete) and the **waterer body** (which consists of a hot-dip galvanized frame and a stainless steel water tub).
All FARMTEC waterers/drinkers are developed, manufactured and assembled in the Czech Republic **and have a 3-year warranty**.





We ship the waterers disassembled (foot and body of the waterer are separated). The assembly of the waterer is simple, you can choose the left-hand or right-hand design of the waterer, depending on the location of the outlet hole and also set the opening direction of the float chamber cover. For more information contact us:
